DETAILED ACTION

Drawings

1. Drawings filed on 3/12/04 are accepted.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson et al (6,195,164).

Regarding claims 1-6 and 26-31, Thompson et al discloses systems and methods for calibrating laser ablations comprises a selectively laser ablatable test surface (10); a light detection assembly (16,20); and a processor (26) coupled with light detection assembly for analyzing the detected light to determine a refractive power of the test surface and at least one additional ablation characteristic of the laser ablation system (figures 1, 2a, 2B and column 5, lines 28-39).

Regarding claims 7-8 and 32; see column 5, lines 10-14 for the test surface is ablated into a lens.

Regarding claim 9, see claim 18 and column 1, lines 34-37 for correcting myopia, hyperopia, and astigmatism.

Regarding claims 10-11 and 33-34, see column 5, lines 40-49 for the use of a

CCD.

Regarding claims 12-16 and 40, see abstract for determining optical power and shape of the test surface.

Regarding claims 17-25 and 35-39, 41-44, see column 5, lines 28-56 for transforming light into electrical signals.

Regarding claims 45-46, see column 5 lines 37-39 for the use of computer and processor for determining the refractive power and the shape of the ablated test surface.

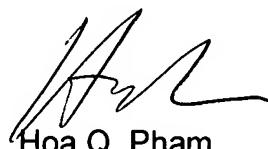

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Somani et al (6,666,855 and 2006/0103839) and Chernyak et al (2005/0215986) disclose method and system for laser calibration and eye tracker camera alignment.
